

## About Us

---

9500 alliance is a group of 9 companies providing adaptive solutions for governments in the fields of intelligence and security, both physical and cyber, covering all operational needs.

*Each service can be provided as a stand-alone , or can be combined with other services, to fully answer clients' specific needs.*

*We also provide training courses and capacity building (we design, equip, train, and help running operational centers for cyber security, influence defense, web intelligence and financial investigations).*

**With dedicated teams, specializing in different aspects of security, protection, intelligence and investigations, 9500 alliance provides:**

- Cyber security and cyber threat intelligence
- Physical security and physical security related intelligence
- Influence defense and influence operations
- Web intelligence
- Financial investigations

## The Solution

The 9500 alliance is our answer to these challenging needs. While each company in the alliance is an expert in its own field (cyber security, web intelligence, influence defense, physical security and more) they all know how to join efforts in different combinations to provide tailor made solutions that integrate with the clients' existing capabilities to provide end-to-end solutions.

For the client it is a one stop shop with a single point of contact, just like a large conglomerate of security and intelligence services, but with the added value of agile, adaptive, and leading in their fields' teams.

## The Need

In today's world, countries are confronted with multiple risks, including physical security risks, cyber security risks, influence risks and financial crime risks.

Each risk needs its own solution with its specific expertise.

In recent years these risks converged in different ways and combinations (physical and cyber, cyber and hostile influence etc.), imposing multi-dimensional risks.

Although these converged risks call for multi-dimensional solutions (in ever changing combinations), still most countries have only parts of the solution, and thus they need complementary capabilities.

## Our unique offering:

- **Most advanced technology**
- **Most up-to-date methodology**
- **Understanding the attacker's perspective**
- **Experience to provide exactly what you need in the highest quality**

## Mitigating cyber security risks

Cyber security services - from SOC to penetration tests, from security procedures to incident response.

.....

Mobile phones security - analyzing mobile phones for suspicious behavior.

.....

Cyber threat intelligence - providing intelligence about hackers and cyber-attacks.

## Mitigating physical risks

Physical security: training law enforcement and army units.

.....

Physical security related intelligence, including OsInt, imagery analysis and more.

## Our Services

## Intelligence and investigations

Web intelligence and investigations - from the open web, social media and dark web.

.....

Financial intelligence and crypto currencies investigations.

## Mitigating hostile Influence attacks

Influence defense - identifying and countering hostile influence campaigns, taking down executive impersonations.

.....

Running campaigns - for better population resilience, counter campaign, positive campaigns.

# Why Us?

We have decades of accumulated experience in identifying and analyzing threats, reducing exposure and countering hostile activity.

Our counter influence campaigns team and influence operations team are among the most experience teams in the world, mastering both the defender's and the attacker's sides.

Our cyber security team is comprised of leading experts, veterans of elite IDF & ISA operational and technological units.

Our physical security team has over 25 successful years in the security sector, providing the tools to enable operational continuity in some of the most challenging and fragile environments.

Our web intelligence team provides high-end intelligence services, training, and support to state organizations. The team is the trusted advisor and service provider of state organizations worldwide.
