

## About Us

---

9500 alliance is a group of 9 companies providing tailor made solutions for intelligence and security needs, both physical and cyber, covering all operational needs.

*Each service can be provided as a stand-alone service, or can be combined with other services, to fully answer all clients' needs.*

**With dedicated teams, specializing in different aspects of security, protection and intelligence, 9500 alliance provides:**

- Cyber security and cyber threat intelligence
- Physical security and physical security related intelligence
- Brand protection and cyber-influence security
- Business intelligence
- Financial investigations
- Training courses

## The Solution

The 9500 alliance is our answer to these challenging needs. While each company in the alliance is an expert in its field (cyber security, brand protection, web intelligence, influence defense, physical security and more) they all know how to join efforts in different combinations to provide tailor made solutions that integrate with the clients' existing capabilities to provide holistic solutions.

For the client it is a one stop shop with a single point of contact, just like a large conglomerate of security and intelligence services, but with the added value of agile, adaptive, and leading in their fields' teams.

## The Need

In today's world, companies and international corporations are under multiple risks, including physical risks, cyber risks and reputational risks.

Each risk needs its own solution with its specific expertise.

In recent years these risks converged in different ways and combinations (physical and cyber, cyber and reputational etc.) imposing multidimensional risks.

Although these converged risks call for multi-dimensional solutions (in ever changing combinations), still most companies have only parts of the solution, thus they need complementary services.

## Our unique offering:

- **Most advanced technology**
- **Most up-to-date methodology**
- **Understanding the attacker's perspective**
- **Experience to provide exactly what you need in the highest quality**

# Why Us?

We have decades of accumulated experience in identifying and analyzing threats, reducing exposure and countering hostile activity.

Our brand protection team runs a robust technology, monitoring, detecting and removing online threats such as phishing attempts, executive impersonation, and more; with first tier international clients.

Our cyber security team is comprised of leading experts, veterans of elite IDF & ISA operational and technological units.

Our physical security team has over 25 successful years in the security sector, providing some of the world's leading organizations with the tools to enable them to carry out business in some of the most challenging and fragile of environments.

Our business intelligence team provides high-end intelligence services, and support to corporations and state organizations. The team is the trusted advisor and service provider of state organizations and leading corporations worldwide.
